Backend Software Engineer — Java · Spring Boot · System Design · AWS

Personal Profile

Final-year Software Engineering student at Manchester Metropolitan University (graduating 2027), specialising in backend development with Java and Spring Boot. I'm passionate about system design: how systems behave and fail under load, and how to keep codebases scalable, reliable and maintainable. I'm also drawn to cloud architecture and am currently studying for the AWS Certified Cloud Practitioner certification. My D&D Party Finder App brings these interests together to solve a real problem I faced myself. I'm a reliable, hard-working team player, with time management and teamwork developed through my degree and my work in hospitality. I'm seeking a graduate backend role or a summer 2027 internship where I can ship production features and learn how real systems are designed, deployed and operated.

Education

BSc (Hons) Software Engineering — Manchester Metropolitan University

2024 – 2027

Relevant Modules: Software Design & Architecture, Software Testing and Quality Assurance, Databases, Software Development Processes, Full-Stack Development, Programming Languages and Paradigms.

First-year average: 72% (First) | Second-year average: 60% (2:1) | Expected classification: 2:1

Technical Skills

- **Languages:** Java (primary), JavaScript, Python
- **Backend:** Spring Boot, Node.js/Express
- **Databases:** PostgreSQL, MongoDB
- **Testing:** JUnit 5, Mockito
- **DevOps & Cloud:** Version control through Git hub (Branch protection, merging, conventional commits) , Docker, CI/CD with GitHub Actions, AWS (Currently learning), Redis
- **System/Software Design:** Layered and Clean Architecture, SOLID, design patterns (Strategy, Decorator, Observer), Load balancing, Caching
- **Frontend:** React.js, Tailwind CSS

Projects

D&D Party Finder (in progress) | Java, Spring Boot, PostgreSQL, Redis, Docker, AWS, React

A Spring boot API with a basic React.js frontend to help users find Party members in their local area for the tabletop strategy game Dungeons and Dragons.

GitHub: https://github.com/IsaacRid/DnDPartyFinder

Board Game Simulation — Software Design & Architecture Coursework | Java, Spring Boot

A board game simulation built for MMU's Software Design and Architecture module, implementing many design patterns with a clean Spring Boot Architecture.

GitHub: https://github.com/IsaacRid/SDAGame

E-Commerce Application | Node.js/Express, MongoDB, React.js

A full-stack e-commerce application allowing users to sign up, log in, browse products, add them to a cart, and complete purchases.

GitHub: https://github.com/IsaacRid/e-commerce-store

Experience

Cocktail Bartender, Craft and Company, Chester | March 2026 – October 2026

- Made classic and signature cocktails to spec during high-volume service, working closely with the team to keep service running smoothly and advising customers on drink choices.
- Handled opening and closing, daily prep (juices, syrups, garnishes, batching) and card and cash payments.
- Promoted from bar back to bartender for my hard work, dedication and professionalism.

Certifications & Courses

- AWS Certified Cloud Practitioner (in progress, exam booked [Month] 2026)
- Manchester Digital Grad Recharge scheme (2026): a programme connecting graduates with tech employers, recruiters and professionals, including interview preparation and CV workshops.
